

## Distinctly Neato

### D-shape advantage

Neato's design fits a large 0.7 liter dirt bin and a brush that's nearly double the size of those on standard round robots. Choose Neato for a more complete clean in corners and along walls—with less frequent emptying.

### Deeper, more powerful clean

Switch from Eco to Turbo mode for those areas that need a more thorough clean with extra pickup. Neato's suction combined with filters that trap up to 99.97% of allergens make Neato the clear choice for clean.

### Smarter navigation

We use LIDAR, not cameras, to completely navigate and clean your home. Instead of bouncing around, Neato uses lasers to clean with precision to remember its place in the room, even in the dark. We call this LaserSmart.

### Total control

Actual app interface may look different

Get cleaning in minutes with Neato's hassle-free, Bluetooth-enabled setup. Using the MyNeato app, easily create custom cleaning schedules and manage where Neato cleans and where it doesn't. You've got better things to do.

## At Neato, we do things smarter.

Neato makes life easier with powerful vacuuming and smart engineering. With a history and reputation for innovation, Neato builds products that people need with a premium quality that they love. Neato's industry-first D-shape cleans corners and edges, where dirt likes to hide, and LaserSmart technology gives better coverage for a more complete clean.

**The Ultimate Cleaning Machine**

# Key Features

## Virtual Zone cleaning

With virtual Zones, you can partition your home to target trouble spots more often—like crumbs under the dining table (D10, D9 only). Or create No-Go Zones to tell Neato what to avoid such as a child's play area. It's easy to set up through the MyNeato app.

## Quick Boost

Sometimes your robot needs a little extra power for long cleaning runs. With Quick Boost (D10, D9 only), it charges accordingly, and returns to exactly where it left off to finish the job. It works smarter so your floors get cleaned faster.

## Multiple floorplans

Have a multi-story home? You can save up to 3 floorplans<sup>1</sup>, each with their own unique Zones. Add a Slimline Charge Base to each level of your home for extra convenience. After all, your needs don't apply to just one floor.

## Better with age

Technology improves over time, and so should your robot. That's why Neato sends regular software updates automatically, so you always have the latest features as soon as they're released.
